Energy Efficiency and Historic Buildings-David Pickles 2016-04-29 This guidance provides advice on how unused or intermittently used chimneys can be made more energy efficient by preventing draughts. Open chimneys and flues can be useful sources of ventilation but they can often let too much warm air out and cold air in. The resultant draughts can create uncomfortable conditions. Chimneys in older buildings can develop a wide range of defects. This guidance note also discusses how to avoid introducing further defects when measures are taken to improve energy efficiency but it does not cover the diagnosis or remedy of common defects. Chimneys are often prominent and significant parts of historic buildings and fireplaces are frequently striking and significant elements of the interior. Many chimneys were constructed in single skin brickwork and are very sensitive to alteration. Great care should be taken and specialist advice sought, before adapting or

altering a chimney. Fireplaces and chimneys are often still in use, some for open fires, some for room heating stoves, and some for central heating and hot water boilers. Many other fireplaces and chimneys are no longer needed and have been blocked up, temporarily or permanently. Whether used or unused, fireplaces and chimneys can have an important role in improving the energy efficiency of a building. This guidance forms one of a series of thirteen guidance notes covering the thermal upgrading of building elements such as roofs, walls and floors.

Fair Housing Act Design Manual-U.S. Department of Housing and Urban Development 2005 The Fair Housing Act Design Manual: A Manual to Assist Designers and Builders in Meeting the Accessibility Requirements of The Fair Housing Act provides clear and helpful guidance about ways to design and construct housing which complies with the Fair Housing Act. The manual provides direct information about the accessibility requirements of the Act, which must be incorporated into the design, and construction of multifamily housing covered by the Act. It carries out two statutory responsibilities: (1) to provide clear statement of HUD's interpretation of the accessibility requirements of the Act so that readers may know what actions on their part will provide them with a "safe harbor"; and (2) to provide guidance in the form of recommendations which, although not binding meet the Department's obligation to provide technical assistance on alternative accessibility

approaches which will comply with the Act, but may exceed its minimal requirements. The latter information allows housing providers to choose among alternative and also provides persons with disabilities with information on accessible design approaches. The Manual clarifies what are requirements under the Act and what are HUD's technical assistance recommendations. The portions describing the requirements are clearly differentiated from the technical assistance recommendations.

Distinction-Pierre Bourdieu 2013-04-15 No judgement of taste is innocent - we are all snobs. Pierre Bourdieu's *Distinction* brilliantly illuminates the social pretensions of the middle classes in the modern world, focusing on the tastes and preferences of the French bourgeoisie. First published in 1979, the book is at once a vast ethnography of contemporary France and a dissection of the bourgeois mind. In the course of everyday life we constantly choose between what we find aesthetically pleasing, and what we consider tacky, merely trendy, or ugly. Taste is not pure. Bourdieu demonstrates that our different aesth

WHO Guidelines for Indoor Air Quality-World Health Organization 2010 This book presents WHO guidelines for the protection of public health from risks due to a number of chemicals commonly present in indoor air. The substances considered in this review, i.e. benzene, carbon monoxide, formaldehyde, naphthalene, nitrogen dioxide, polycyclic aromatic hydrocarbons (especially benzo[a]pyrene), radon, trichloroethylene and tetrachloroethylene, have indoor sources, are known in respect of their hazardousness to health and are often found indoors in concentrations of health concern. The guidelines are targeted at public health professionals involved in preventing health risks of environmental exposures, as well as specialists and authorities involved in the design and use of buildings, indoor materials and products. They provide a scientific basis for legally enforceable standards.

The Great Explosion-Brian Dillon 2015-05-07 The Great Explosion by Brian Dillon: a masterful account of a terrible disaster in a remarkable place In April 1916, shortly before the commencement of the Battle of the Somme, a fire started in a vast munitions works located in the Kentish marshes. The resulting series of explosions killed 108 people and injured many more. In a brilliant piece of storytelling, Brian Dillon recreates the events of that terrible day - and, in so doing, sheds a fresh and unexpected light on the British home front in the Great War. He offers a chilling natural history of explosives and their effects on the earth, on buildings, and on human and animal bodies. And he evokes with vivid clarity one of Britain's strangest and most remarkable landscapes - where he has been a habitual explorer for many years. The Great Explosion is a profound work of narrative, exploration and inquiry from one of our most brilliant writers. 'The Great Explosion is exhilarating and moving and lyrical. It is a quiet evisceration of a landscape through the discovery of a lost history of destructiveness, a meditation on Englishness, an autobiography, a mapping of absences. I loved it.' Edmund de Waal, author of The Hare with Amber Eyes 'What a fascinating, unclassifiable, brilliant book, confirming Brian Dillon's reputation as one of our most innovative and elegant non-fictioneers. No one else could have written it.' Robert Macfarlane, author of The Old Ways 'Forensic, fascinating, endlessly interesting' Philip

Hoare, Samuel Johnson Prize-winning author of *Leviathan and The Sea Inside* 'A subtle, human history of the early twentieth century ... Explosions are a fruitful subject in Dillon's hands, one that enables him to reflect movingly on the instant between life and death, on the frailty of human endeavour, and on the readiness of nations to tear one another apart. The Great Explosion deftly covers a tumultuous period of history while centring on the tiniest moments - just punctuation marks in time' *Financial Times* '[Dillon's] account of the Faversham explosion is as bold as it is dramatic, while his descriptive passages about the marshlands of Kent are so evocative that you can practically feel the mud sticking at your feet' *Evening Standard* 'A brilliant evocation of place grasped in its modernity' *Guardian* 'Dillon ... has a WG Sebald-like gift for interrogating the landscape ... a work of real elegiac seriousness that goes to the heart of a case of human loss and destruction in England's sinister pastures green' Ian Thomson, *Irish Times* 'Exhilarating ... utterly beguiling' *Literary Review*
