Education in the Lao People's Democratic Republic-Richard Noonan 2020-05-20 This book provides a comprehensive and in-depth description of the education system in Lao PDR. It covers pre-school, primary, secondary general, secondary technical and vocational, post-secondary non-higher education, and adult non-formal education and training. In addition to the main content, the book includes a glossary of terms and abbreviations used; and an appendix on the organizational structure of the Ministry of Education and Sports, including the linkages between the national, provincial and district level. The content covers public and private sector education provision alike.

The Routledge Handbook of Poverty in the United States-Stephen Haymes 2014-12-17 In the United States, the causes and even the meanings of poverty are disconnected from the causes and meanings of global poverty. The Routledge Handbook of Poverty in the United States provides an authoritative overview of the relationship of poverty with the rise of neoliberal capitalism in the context of globalization. Reorienting its national economy towards a global logic, US domestic policies have promoted a market-based strategy of economic development and growth as the obvious solution to alleviating poverty, affecting approaches to the problem discursively, politically, economically, culturally and experientially. However, the handbook explores how rather than alleviating poverty, it has instead exacerbated poverty and pre-existing inequalities - privatizing the services of social welfare and educational institutions, transforming the state from a benevolent to a punitive state, and criminalizing poor women, racial and ethnic minorities, and immigrants. Key issues examined by the international selection of leading scholars in this volume include: income distribution, employment, health, hunger, housing and urbanization. With parts focusing on the lived experience of the poor, social justice and human rights frameworks - as opposed to welfare rights models - and the role of helping professions such as social work, health and education, this comprehensive handbook is a vital reference for anyone working with those in poverty, whether directly or at a macro level.

Sick Schools-David V. Anderson 2020-01-10 Who's afraid of for-profit education? Those who work in non-profit or government owned and operated schools. Many parents and other stakeholders have been made fearful by this education establishment. What's more important to humans: nutrition or education? Nutrition is more important because it is the prerequisite for other human activities, including education. What organizations provide food and who pays for the food? Food is provided by for-profit farmers, for-profit processors, for-profit wholesalers, and for-profit retailers. Most food is purchased with the consumers' own money, but a significant amount is purchased by low-income individuals using food stamps. Why can't education be provided similarly using education stamps? We trust for-profit enterprises to provide our food. Why can't we trust for-profit enterprises to provide K-12 education? Fearmongers have frightened us and made us into gullible compliant socialists who despise commercial activities in education. Go to the supermarket and ponder its marvelous array of foods and then contemplate how a for-profit K-12 education sector would please and amaze its customers.

Priorities of the Professoriate-Fred A. Bonner 2015-04-01 Established in 2006, the American Association of Blacks in Higher Education (AABHE), formerly constituted as the Black Caucus (American Association of Higher Education), has been the consistent voice of Black issues in academe. According to the stated mission, the AABHE pursues the educational and professional needs of Blacks in higher education with a focus on leadership, equity, access, achievement and other vital issues impacting students, faculty, staff, and administrators. AABHE also facilitates and provides opportunities for collaborating and networking among individuals, institutions, groups and agencies in higher education in the United States and internationally. This 2012 year will mark the beginning of the AABHE research consortium, an arm of the organization that will advance scholarly research and publications to highlight critical issues pertinent to the success and uplift of Black populations across the higher education diaspora. This book will explore important issues across multiple fields—fields represented by the scholars/members of AABHE. AABHE scholars will contribute chapters based on their disciplinary expertise. The work of Ernest Boyer as articulated in the book Faculty Priorities Reconsidered: Rewarding Multiple Forms of Scholarship will be used as the conceptual foundation to ground this important work. A particular focus on the elements of Boyer's seminal work will include chapters devoted to the Scholarship of Teaching and Learning; Scholarship of Engagement; Scholarship of Discovery; and Scholarship of Integration. This scholarly book is unique in that it provides essential insight on how not only faculty, but also administrators who are invested in insuring that the priorities of the professoriate are aligned with the mission and vision of urban postsecondary institutions.

It's Not About Grit-Steven Goodman 2018 Speaking out against decades of injustice and challenging deficit perceptions of young learners and their families, It's Not About Grit pulls back the veil, revealing the social systems that marginalize and stigmatize mostly poor, urban students of colour and their communities. At the same time, author Steven Goodman, for nearly 35 years founder and director of NYC's highly acclaimed Educational Video Center (EVC), shows the tremendous intelligence, resilience, and sense of agency of these students. Through the students' in-school and out-of-school experiences, enhanced with curriculum guides and award-winning video clips from EVC, Goodman encourages educators to make a difference and demonstrates how to create safe and inclusive spaces where their teaching responds to students' culture, race, gender, sexual orientation, language, housing status, and ability. Teachers will use this book to develop a pedagogy of transformative teaching.

Making Public in a Privatized World-David A. McDonald 2016-02-15 How do we provide effective public services in a deeply neoliberal world? In the wake of the widespread failure of privatisation efforts, societies in the global south are increasingly seeking progressive ways of recreating the public sector. With contributors ranging from cutting-edge scholars to activists working in health, water, and energy provision, and with case studies covering a broad spectrum of localities and actors, Making Public in a Privatized World uncovers the radically different ways in which public services are being reshaped from the grassroots up. From communities holding the state accountable for public health in rural Guatemala, to waste pickers in India and decentralized solar electricity initiatives in Africa, the essays in this collection offer probing insights into the complex ways in which people are building genuine alternatives to privatization, while also illustrating the challenges which communities face in creating public services which are not subordinated to the logic of the market, or to the monolithic state entities of the past.

Best Practices in Online Program Development-Elliot King 2014-11-20 Best Practices in Online Program Development is a practical, hands-on guide that provides the concrete strategies that

academic and administrative departments within institutions of higher learning need to develop in order to create and maintain coherent and effective online educational programs. Unlike individual courses, an online education program requires a comprehensive, inter-departmental effort to be integrated into the ongoing educational project of a college or university. This book focuses on the: Integration of online education into the institutional mission Complex faculty-related issues including recruiting, training, and teaching Multifaceted support required for student retention and success Need for multilayered assessment at the course, program, technical, and institutional levels Challenges posed to governance and by the need to garner resources across the institution Model to insure ongoing, comprehensive development of online educational programs Best Practices in Online Program Development covers the above topics and more, giving all the stakeholders in online educational programs the building blocks to foster successful programs while encouraging them to determine what role online education should play in their academic offerings.

Constructing Quantum Mechanics-Anthony Duncan 2019-08-29 Constructing Quantum Mechanics is the first of two volumes on the genesis of quantum mechanics. It covers the key developments in the period 1900-1923, which provided the scaffold on which the arch of modern quantum mechanics was built. This volume traces the early contributions by Planck, Einstein, and Bohr to the theories of black-body radiation, specific heats, and spectroscopy, all showing the need for drastic changes to the physics of their day. It examines the efforts by Sommerfeld and others to provide a new theory, now known as the old quantum theory. After some striking initial successes (explaining the fine structure of hydrogen, X-ray spectra, and the Stark effect), the old quantum theory ran into serious difficulties (failing to provide consistent models for helium and the Zeeman effect) and eventually gave way to matrix and wave mechanics. The book breaks new ground, both in its treatment of the work of Sommerfeld and his associates, and also in its offering of new perspectives on classic papers by Planck, Einstein, and Bohr. Throughout this volume, the authors provide detailed reconstructions of the central arguments and derivations of the physicists involved, allowing for a full and thorough understanding of the key principles.

Systemic and Non-Systemic Opposition in the Russian Federation-Cameron Ross 2016-03-03 Over the period December 2011-July 2013 a tidal wave of mass protests swept through the Russian Capital and engulfed scores of cities and regions. Civil society, it appeared, had at last woken up. This fascinating book examines the rise and fall of the non-systemic opposition and the role of the systemic political opposition during this turbulent period. Leading experts in the field from Russia along with scholars from the UK and the US reflect on the conditions that have made large-scale protests possible, the types of people who have taken part and the goals of the opposition movement at both the national and regional levels. Contributors discuss what steps the regime has taken in response to this challenge and examine the relationship between the systemic and non-systemic opposition and what potential exists for the creation of a broad-based opposition coalition. The role of the expanding Russian middle class is discussed along with contemporary developments among the Russian left against the backdrop of the global economic crisis. The political, social and ethnic dimensions of the protest movement are also examined at both the national and regional levels in this truly comprehensive study of the rebirth of civil society in modern Russia.

The History of Music Production-Richard James Burgess 2014-06-25 In The History of Music Production, Richard James Burgess draws on his experience as a producer, musician, and author. Beginning in 1860 with the first known recording of an acoustic sound and moving forward chronologically, Burgess charts the highs and lows of the industry throughout the decades and concludes with a discussion on the present state of music production. Throughout, he tells the story of the music producer as both artist and professional, including biographical sketches of key figures in the history of the industry, including Fred Gaisberg, Phil Spector, and Dr. Dre. Burgess argues that while technology has defined the nature of music production, the drive toward greater control over the process, end result, and overall artistry come from producers. The result is a deeply knowledgeable book that sketches a critical path in the evolution of the field, and analyzes the impact that recording and disseminative technologies have had on music production. A key and handy reference book for students and scholars alike, it stands as an ideal companion to Burgess's noted, multi-edition book The Art of Music Production.

Ethical Issues and Citizen Rights in the Era of Digital Government Surveillance-Cropf, Robert A. 2016-02-02 Questions surrounding the concept of freedom versus security have intensified in recent years due to the rise of new technologies. The increased governmental use of technology for data collection now poses a threat to citizens' privacy and is drawing new ethical concerns. Ethical Issues and Citizen Rights in the Era of Digital Government Surveillance focuses on the risks presented by the usage of surveillance technology in the virtual public sphere and how such practices have called for a re-examination of what limits should be imposed. Highlighting international perspectives and theoretical frameworks relating to privacy concerns, this book is a pivotal reference source for researchers, professionals, and upper-level students within the e-governance realm.

Food Insecurity and Revolution in the Middle East and North Africa-Habib Ayeub 2019-09-30 'Food Insecurity and Revolution in the Middle East and North Africa' studies the political economy of agrarian transformation in the eponymous regions. Examining Egypt and Tunisia in detail as case studies, it critiques the dominant tropes of food security offered by the international financial

institutions and promotes the importance of small-scale family farming in developing sustainable food sovereignty. Egypt and Tunisia are located in the context of the broader Middle East and broader processes of war, environmental transformation and economic reform. The book contributes to uncovering the historical backdrop and contemporary pressures in the Middle East and North Africa for the uprisings of 2010 and 2011. It also explores the continued failure of post-uprising counter-revolutionary governments to directly address issues of rural development that put the position and role of small farmers centre stage.

Research Anthology on Religious Impacts on Society-Management Association, Information Resources 2020-07-21 Religion is considered by many to be something of the past, but it has a lasting hold in society and influences people across many cultures. This integration of spirituality causes numerous impacts across various aspects of modern life. The variety of religious institutions in modern society necessitates a focus on diversity and inclusiveness in the interactions between organizations of different religions, cultures, and viewpoints. Research Anthology on Religious Impacts on Society examines the cultural, sociological, economic, and philosophical effects of religion on modern society and human behavior. Highlighting a range of topics such as religious values, social reforms, and spirituality, this publication is an ideal reference source for religious officials, church leaders, psychologists, sociologists, professionals, researchers, academicians, and students.

The Dirty College Game-Al Figone 2019-07-26 Commercial aspects of college football and basketball during the mid- to late 20th century were dominated by a few "get rich quick" schools. Though the NCAA was responsible for controlling such facets of college sports, the organization was unwilling and unable to control the excesses of the few who opposed the majority opinion. The result was a period of corruption, rules violations, unnecessary injuries and overspending. These events led to the formation of larger conferences, richer bowl games and rules intended to preserve the "money-making" value of college football and basketball. This book explores gambling, academic fraud, illegal booster activity and the single-minded pursuit of television contracts in college sports, as well as the NCAA's involvement--or lack thereof--in such cases.

The Human City-Joel Kotkin 2016-04-12 The author of *The Coming of Neo-Feudalism* and *The New Class Conflict* challenges conventions of urban planning. Around the globe, most new urban development has adhered to similar tenets: tall structures, small units, and high density. In *The Human City*, Joel Kotkin—called “America’s uber-geographer” by David Brooks of the *New York Times*—questions these nearly ubiquitous practices, suggesting that they do not consider the needs and desires of the vast majority of people. Built environments, Kotkin argues, must reflect the preferences of most people—even if that means lower-density development. *The Human City* ponders the purpose of the city and investigates the factors that drive most urban development today. Armed with his own astute research, a deep-seated knowledge of urban history, and a sound grasp of economic, political, and social trends, Kotkin pokes holes in what he calls the “retro-urbanist” ideology and offers a refreshing case for dispersion centered on human values. This book is not anti-urban, but it does advocate a greater range of options for people to live the way they want at all stages of their lives. Praise for *The Human City* “Kotkin . . . presents the most cogent, evidence-based and clear-headed exposition of the pro-suburban argument In pithy, readable sections, each addressing a single issue, he debunks one attack on the suburbs after another. But he does more than that. He weaves an impressive array of original observations about cities into his arguments, enriching our understanding of what cities are about and what they can and must become.” —Shlomo Angel, *Wall Street Journal* “The most eloquent expression of urbanism since Jane Jacobs’s *The Death and Life of Great American Cities*. Kotkin writes with a strong sense of place; he recognizes that the geography and traditions of a city create the contours of its urbanity.” —Ronnie Wachter, *Chicago Tribune*

A Search for Common Ground-Frederick M. Hess 2021 At a time of bitter national polarization, there is a critical need for leaders who can help us better communicate with one another. In *A Search for Common Ground*, Rick Hess and Pedro Noguera, who have often fallen on opposing sides of the ideological aisle over the past couple of decades, candidly talk through their differences on some of the toughest issues in K-12 education today—from school choice to testing to diversity to privatization. They offer a sharp, honest debate that digs deep into their disagreements, enabling them to find a surprising amount of common ground along the way. Written as a series of back-and-forth exchanges, this engaging book illustrates a model of responsible, civil debate between those with

substantial, principled differences. It is also a powerful meditation on where 21st-century school improvement can and should go next. Book Features: Modeling dialogue: Rick and Pedro provide a model for how to sort through complicated issues and find common ground in today's atmosphere of distrust. Deliberate, sustained exchange: Rick and Pedro demonstrate how deliberate, sustained reflection allows them to respectfully flesh out differences and sharpen their own thoughts. Left and Right Politics: Rick (generally Right) and Pedro (generally Left) offer a window into where they do and don't agree on education and point the way to principled cooperation. Readable and conversational: Rather than pushing a partisan agenda, Rick and Pedro have crafted a stimulating read for education newcomers and experts alike. Unique approach: While other books about the different sides of the education debates simply present paired essays, Rick and Pedro actually engage with each other to strive for a deeper understanding of their differences.

From Intercountry Adoption to Global Surrogacy-Karen Smith Rotabi 2016-12-12 Intercountry adoption has undergone a radical decline since 2004 when it reached a peak of approximately 45,000 children adopted globally. Its practice had been linked to conflict, poverty, gender inequality, and claims of human trafficking, ultimately leading to the establishment of the Hague Convention on Intercountry Adoption (HCIA). This international private law along with the Convention on the Rights of the Child affirm the best interests of the child as paramount in making decisions on behalf of children and families with obligations specifically oriented to safeguards in adoption practices. In 2004, as intercountry adoption peaked and then began a dramatic decline, commercial global surrogacy contracts began to take off in India. Global surrogacy gained in popularity owing, in part, to improved assisted reproductive technology methods, the ease with which people can make global surrogacy arrangements, and same-sex couples seeking the option to have their own genetically-related children. Yet regulation remains an issue, so much so that the Hague Conference on Private International Law has undertaken research and assessed the many dilemmas as an expert group considers drafting a new law, with some similarities to the HCIA and a strong emphasis on parentage. This ground-breaking book presents a detailed history and applies policy and human rights issues with an emphasis on the best interests of the child within intercountry adoption and the new conceptions of protection necessary in global surrogacy. To meet this end, voices of surrogate mothers in the US and India ground discourse as authors consider the human rights concerns and policy implications. For both intercountry adoption and global surrogacy, the complexity of the social context anchors the discourse inclusive of the intersections of poverty and privilege. This examination of the inevitable problems is presented at a time in which the pathways to global surrogacy appear to be shifting as the Supreme Court of India weighs in on the future of the industry there while Thailand, Cambodia and other countries have banned the practice all together. There is speculation that countries in Africa and possibly Central America appear poised to pick up the multi-million dollar industry as the demand for healthy infants continues on.

The Palgrave Handbook of State-Sponsored History After 1945-Berber Bevernage 2018-02-03 This handbook provides the first systematic integrated analysis of the role that states or state actors play in the construction of history and public memory after 1945. The book focuses on many different forms of state-sponsored history, including memory laws, monuments and memorials, state-archives, science policies, history in schools, truth commissions, historical expert commissions, the use of history in courts and tribunals etc. The handbook contributes to the study of history and public memory by combining elements of state-focused research in separate fields of study. By looking at the state's memorialising capacities the book introduces an analytical perspective that is not often found in classical studies of the state. The handbook has a broad geographical focus and analyses cases from different regions around the world. The volume mainly tackles democratic contexts, although dictatorial regimes are not excluded.

Teaching Big History-Richard B. Simon 2014-12-23 Big History is a new field on a grand scale: it tells the story of the universe over time through a diverse range of disciplines that spans cosmology, physics, chemistry, astronomy, geology, evolutionary biology, anthropology, and archaeology, thereby reconciling traditional human history with environmental geography and natural history. Weaving the myriad threads of evidence-based human knowledge into a master narrative that stretches from the beginning of the universe to the present, the Big History framework helps students make sense of their studies in all disciplines by illuminating the structures that underlie the universe and the connections among them. Teaching Big History is a powerful analytic and pedagogical resource, and serves as a comprehensive guide for teaching Big History, as well for sharing ideas about the subject and planning a curriculum around it. Readers are also given helpful advice about the administrative and organizational challenges of instituting a general education program constructed around Big History. The book includes teaching materials, examples, and detailed sample exercises. This book is also an engaging first-hand account of how a group of professors built an entire Big History general education curriculum for first-year students, demonstrating how this thoughtful integration of disciplines exemplifies liberal education at its best and illustrating how teaching and learning this incredible story can be transformative for professors and students alike.
